

Inspiring Teaching practice example

Applying criteria and strategies for evaluating and verifying information online

Author	Milka Ivanlić - Croatia
Title	Applying criteria and strategies for evaluating and verifying information online
TET-SAT Area	Digital Content Use and Production
Number and name of the illustrated competence	Question 13. Finding and evaluating digital information
Estimated level for this competence	Expert
Learning outcome(s) associated with it	Students are going to be able to identify safe and reliable web – pages and informations found online
Type or name of ICT used	Students explore web on certain criteria
What you do that meet this level	First, I talk with students about web pages they often visit. I ask them how they can differentiate correct information from incorrect on the web. They work in pairs – they write their criteria for evaluating web pages and information. They read what they have written. Then I add some criteria to their own (is the author of the page/article named, when was the last time that the page was updated, ...). Then they have to choose a web page (work in pairs) and evaluate it using the criteria we made together. Then we talk about what they have found and done.
Image or link to the example	This is an example of the criteria for evaluating web pages: https://drive.google.com/file/d/14aDQsLyLa4Ffb11rZA8wM5wRgLkYi5Ce/view?usp=sharing

Draft actions to move to the next level

Share ideas with other colleagues, include parents (students can teach parents).
