

Inspiring Teaching practice example

Make a presentation with shared documents in a group, find information and evaluate own work, group work and also make peer-assessment

| | |
|--|---|
| Author | Anna Haapalainen - Finland |
| Title | Make a presentation with shared documents in a group, find information and evaluate own work, group work and also make peer-assessment |
| TET-SAT Area | Digital Content Use and Production |
| Number and name of the illustrated competence | Question 15. Teachers' capacity to integrate ICT-based productivity tools for the creation of content |
| Estimated level for this competence | Proficient |
| Learning outcome(s) associated with it | How to work in a group and share workload (social skills), how to find reliable information, how to find legal pictures (Pixabay, Google search), how to make a good presentation, learn most common chronic diseases in Finland, how to share documents and work online |
| Type or name of ICT used | O365 online tools Word and PowerPoint (shared documents), peda.net (pedagogical social network), Google Forms, Socrative, Quizlet live, Roll and rock |
| What you do that meet this level | My pupils use O365 online tools to make presentation in Health Science. They make a presentation (PowerPoint) and present it to whole class. They make self-assessments, evaluate their groups work and also peer-evaluate other group's presentation. They also make their own questions to a Socrative test. I use it to evaluate how well they have learned the whole area we are studying (most common chronic health issues in Finland). I also make them work in a group (group test) to answer Quizlet Live (very nice group game) and Roll and Rock (also fun group game) to evaluate their learning. Pupils use textbooks and mobile phones to find information and our school laptops for online working. We also discuss how to find legal pictures to presentations |
